This manual contains a description of the main functions of the mobile phone.

The content of this manual is correct. The description of some features may vary due to changes in the software or service provider. The company reserves the right to make changes to the specifications without prior notice.

This phone is intended for mobile use, making and receiving calls, sending SMS messages, accessing the Internet (if provided), etc. Turn off your phone if you are near chemical plants, petrol stations and other places where explosive items may be present.

Keep your phone out of the reach of children.

Switch off your phone while on board an airplane, but do not use the phone during flight.

Switch off your phone when there are devices such as pacemakers and other medical equipment that may be affected by your mobile phone's work.

The warranty does not cover non-original spare parts. Never try to disassemble your phone yourself. If necessary, contact the service.

Do not charge the phone without a rechargeable battery. The phone should be recharged in a well-ventilated place and away from lightly flammable and explosive items.

To prevent demagnetization, keep your phone away from such items as magnetic disks and credit cards.

Avoid getting liquid on your phone. If the liquid enters the machine, it is necessary to remove the battery and contact the service.

Do not use the phone in places with very high or very low temperatures. Never leave your phone exposed to direct sunlight, high humidity or dust.

Do not rinse the phone with water and do not use harsh detergents.

Wireless phones are sensitive to radio interference, which may affect the operation of the device.

Use only accessories and accumulators recommended by the manufacturer.

Only use the appliance in its normal operating condition, as specified in the instruction manual.

Do not throw the battery in fire!

In order to avoid the ingestion of heavy metals, acids, alkali in water or soil that causes significant damage to the environment, dispose of the spent battery after expiration of service in accordance with the requirements of the law. For non-compliance with the rules of utilization legislation there is a legal responsibility.

Information on the safe disposal of lithium-ion

batteries is available at the nearest specialized service center.

Note: The manufacturer of the device reserves the right to complete the battery of the battery other than the specified characteristics.

Making a Call

Dial the phone number using the numeric keypad on your phone or go to the call log and press the Call button to make a call. You can also make a call from the Contacts menu by selecting the contact you want.

Speed dial

Go to the Main Menu->Contacts->Options ->Phonebook Settings->Speed Dial.
In this menu you can store up to 8 phone numbers for speed dial, which correspond to numbers 2-9 on the phone keypad. Phone numbers are selected from the phone book. Long press key 2-9 in standby mode will call the given number.

SOS calling

You can save up to 5 numbers for an emergency call. To enable / disable the function, go to the SOS->SOS status menu in the main menu. To add numbers, go to the menu to SOS->SOS numbers, to edit the message, select SOS->SOS SMS.

Long pressing the SOS button phone will automatically send SMS and make alternate calls through the list of configured phone numbers (no more than 3 cycles).

Receiving the Call

When you receive a call, press the "Call" button to accept the incoming call. Click the "End" button to reject an incoming call.

Profiles

Ringtones, volume and other settings are

configured in User Profiles (Menu-> Settings->Profiles). Available 4 programmed profiles: General, Silent, Meeting, Outdoor. To activate the profile, click Options->Activate, for editing: Options-> Customize.

Using Menu

To go to the menu, press the Menu key (LSK) or the center key. To move between items, press the Up / Down / Right / Left buttons

The menu contains the following items

Call story

Go to the Call story menu to view received, dialed and missed calls. For each call, the following options are available in the Options menu: View details, Call subscriber, Write message, Add to contacts, Add to blacklist, Delete

There is an option to customize in Call Settings:

- Blacklist
- Enable / disable auto redial
- Enable / disable automatic call recording
- Answer mode

- Call divert
- Call waiting
- Call barring

Contacts

The Phonebook serves to search for saved contacts, add new contacts, copy / move contacts from phone to SIM card and vice versa, and set speed dialing.

Ways to save a new contact in the phone book:

1. Save a dialed, received, or missed number from the call log: In the call log, press Options-Save in the phone book.

2. Save the new contact directly from the Contacts menu: Menu-Contacts-Add new.

Multimedia

Note: it is advisable to use the following functions in the menu "Multimedia" while the installed memory card.

File manager

This menu allows you to view files stored on a memory card. It is possible to create folders, rename and delete files.

Audioplayer

To turn the audio player in the main menu go to "Multimedia" "Audio Player".
