During call it is also possible to: switch volume in a speakerphone mode, start conversation record, add more persons to conference conversation, turn off\switch on microphone and etc.

You can answer a call by opening the phone (if set in the settings) or by pressing the Answer call key after opening the phone.

Main menu

To access the device's menu, press the left soft key or the center navigation key.

The menu has the following sections:

Audio player: Launched Audio player on a separate menu

Multimedia: In this menu, media features of the device are gathered: camera, gallery, DV camera, video player, voice recorder.

FM radio: Launched FM radio on a separate menu

Call history: register incoming, outgoing and missed calls;

Messaging: for sending SMS messages and reading incoming messages;

Contacts: phone book of telephone contacts and SIM-cards;

My Files. To view the files stored on the memory card

Organizer: alarm clock, calendar, calculator, torch, Bluetooth, Ebook, SIM menu

Settings: phone settings, call settings, display settings, security settings, profiles, connections

Audioplayer

The audio player is designed to listen to music files

To play / pause, press the Center key. To go to the next / previous file - Right / Left. To automatically create a playlist, copy the music files to the memory card in the My music folder. To change the settings, scroll to Options — Settings. To edit playlists, scroll to Options — Playlist. Use the Up / Down keys to adjust the volume.

Multimedia

Caution: It is desirable to use the following functions in the menu "Multimedia" under the condition of the installed memory card.

This section contains applications for working with photos, videos and sound.

Camera – to take photo

Image viewer - to view images.

DV – for video recording

Video player - to view video clips.

Voice recorder - for recording sound.

FM radio

NB! *In this model, FM radio operates with a built-in antenna. To improve the reception quality, you may need to connect a wired headset as an antenna. The sound of the FM radio and audio player is transferred to the external speaker and wired headset.*

To turn on / off, press the center key. To search for radio stations, press Right / Left. Use the Up / Down keys to adjust the volume. The Options menu has the ability to

automatically and manually search channels, view saved stations, record files in a file and enable / disable background playback.

Call history

Call history menu contains incoming, outgoing and missed calls register, counter GPRS traffic and allows: dial contact number, send SMS-messages, add new number to contacts, add number to black list, delete information about call and etc.

Messaging

This menu contains everything you need to send, store, view and delete SMS messages.

Write message: Select to write and send (or save) a new message.

Inbox: Folder with received messages.

Outbox: Folders with sent messages.

Drafts: incomplete messages.

Sentbox: Messages that have been sent.

To Configure Messaging, go to the menu Options—SMS Settings. The Settings menu allows you to set the SMS center numbers for both SIM cards, set the validity period of the message, configure receipt of the delivery status report, adjust the settings for saving messages, switch off or enable push messages.

Phonebook

The Phonebook menu is your phone book, which contains contacts stored in the phone and on SIM cards. The phone memory is designed to store 500 contacts.

Contacts are in alphabetical order. The search bar allows you to find contacts. To switch the method / language of the search press the # key

New contact: press Options--New. Before creating, you have to choose a place to save the contact, enter the Name and phone number, add a photo and melody if necessary, press "Save".

You can add the following data for one contact when saving to Phone: Name, Phone, Icon, Ringtone, Group.

To view the contact, select the cursor and press the center navigation key.

For a call, press the call button.

Additional options open with the left soft key.

Write message: Create and send a text message to the contact.

Edit: edit the contact

Delete: delete the selected contact.

Copy: Copy contact between phone and SIM card.

It also has the ability to: View memory status and delete all contacts, make backups - export - or restore contacts - import - (only if there is a memory card)

*When backing up contacts in the root of the memory card, a system file named vcard****.vcf is created. When restoring contacts, information is taken from the same file.*

My Files

Ebook

SIM menu

Settings

Phone settings: contains date and time settings, language settings, shortcut key settings, scheduling on / off settings. Also, this menu allows you to reset to factory settings (*WARNING. Reset code 1122*)

Display: Wallpaper settings, display contrast, screen backlighting and keystrokes

Security: Provides the ability to set up SIM card lock, lock the phone, auto-lock, and lock certain phone functions. This menu also contains the Blacklist and Whitelist menues.

Call settings. The menu allows you to configure the number of active SIM cards, divert options, call barring, auto-dialing, auto-dialing, and more.

Profiles: The menu is intended to adjust the sound profiles, ie volume settings, ringtones, vibrate mode, key sound and system for different phone usage conditions such as: outdoor, indoors, silence, and more. It is possible to edit the built-in settings. To do this, press Options and Settings. To activate the set of settings, you must select a profile in the menu and press the center button.

Connections: allows you to set up GPRS, specify a default data transfer SIM card, set up an account for data transmission, choose a way to select a network-manual or automatic.

Troubleshooting

Following recommendations may help to solve some problems with phone independently. In case problems occurs try to solve it yourself with following recommendations. If problem is not solved, contact to Sigma mobile service center.

Check whether battery is charged and whether problem continues after device reset.

Try to restore factory settings through menu «Settings - phone – Default settings» (password by default – 1122)

Problems with memory card mostly occurs in case of memory card breakage. Thus, firstly check given card separately. Also recommended to: take off and insert memory card in port, check whether card is put in port correctly, reload phone.

Phone does not power on: check battery charge, repeatedly connect charging device, and wait at least 10 minutes. Press and keep the button «Power on» not less than 5 second. If device does not power on contact in service center.

Battery discharges rapidly: reasons for increased battery charges may be: low air temperature, active using of media programs, huge distance to cellular tower of connection operator.

Battery does not charge: check charging adapter connection to plug. Use only complete charging adapter and cable.

Impossible to call: this problem may be caused by law connection signal, network overloading, incorrect input of contact number, activated function of calling prohibition. Try to change location, check level of connection signal, wipe phone to factory reset. Contact in service center.

Low receiver volume: during conversation, press button «up» to increase volume. Set volume during conversation in profiles. Check signal of cellular connection.

Passwords

Requests to input following passwords may occur during activating and phone use :

Phone password: request occurs during activating. This is the password of general locking.

Password to reset to factory settings - 1122

PIN-code: if Pin-code checking is active, it is required to input code which is given with SIM-card.

PUK code, PIN2 code - also given with SIM card.

Be careful installing blocking passwords: if they are lost, to renew phone functionality is possible only in service center.
